EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Scott Kamholz, Reg. No. 48,543 on 1/13/11.

The application has been amended as follows:

[claim 19] **(Currently amended)** A computer system for recruiting a patient into a clinical trial, the system comprising:
at least one processor programmed with at least a server application, a matcher application, and a security layer, wherein:
the server application, the matcher application, and the security layer are embodied on a non-transitory computer-readable medium; and
the server application is configured to:
request patient-specific data from the patient, the patient-specific data requested including clinical trial eligibility data that comprises at least one of: disease of concern, demographic data, drug classes of interest, prior therapies, specific drugs of interest, years since diagnosis, stage of disease, phase of clinical trial, and concomitant diseases;

collect the patient-specific data from the patient; and
send match result data to the patient;
the matcher application is configured to be responsive to the patient's clinical trial eligibility data and to trial-specific criteria corresponding to the clinical trial to:
determine whether a match exists between the patient and the clinical trial; and
generate the match result data; and
the security layer is configured to:
prevent direct communication between the server and the matcher;
receive the patient-specific data from the server;
send the patient's clinical trial eligibility data to the matcher; and
receive the match result data from the matcher;
remove proprietary trial information from the match result data, thereby generating sanitized match result data; and
send the sanitized match result data to the server.

Drawings

2. The drawings were received on 11/10/10. These drawings are acceptable.

Allowable Subject Matter

3. Claims 2-4 9-12 17 and 19-33 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Regarding claim 17, the closest prior art of record, Michelson in view of Reddy, do not teach:

- receiving at the server from the patient patient-specific data that includes an answer to the at least one clinical trial eligibility question, the patient-specific data comprising at least one of: disease of concern, demographic data, drug classes of interest, prior therapies, specific drugs of interest, years since diagnosis, stage of disease, phase of clinical trial, and concomitant diseases;
- sending the patient-specific data from the server to a security layer;
- sending the patient-specific data from the security layer to a matcher;
- preventing direct communication between the server and the matcher;
- determining using the matcher whether the patient-specific data satisfies the criteria of one or more clinical trials,
- sending match result data from the matcher to the security layer;
- in the security layer, removing proprietary trial information from the match result data, thereby generating sanitized match result data;
- sending the sanitized match result data to the patient;

In particular, the provisional date for the Michelson reference does not disclose or provide support for receiving the recited patient-specific data from the patient at the server (at least one of: disease of concern, demographic data, drug classes of interest,

prior therapies, specific drugs of interest, years since diagnosis, stage of disease, phase of clinical trial, and concomitant diseases.)

Claims 23 and 31 incorporate the same allowable features as claim 17, and are therefore allowable for the same reasons.

Claims 24-30 incorporate the allowable features of claim 17 through dependency and are therefore also allowable.

Regarding claim 19, the closest prior art of record, Michelson in view of Reddy do not teach a system comprising: at least one processor programmed with at least a server application, a matcher application, and a security layer, wherein:

the server application is configured to:

request patient-specific data from the patient, the patient-specific data requested including clinical trial eligibility data that comprises at least one of: disease of concern, demographic data, drug classes of interest, prior therapies, specific drugs of interest, years since diagnosis, stage of disease, phase of clinical trial, and concomitant diseases;

collect the patient-specific data from the patient; and

send match result data to the patient;

the security layer is configured to:

prevent direct communication between the server and the matcher;

receive the patient-specific data from the server;

send the patient's clinical trial eligibility data to the matcher; and

receive the match result data from the matcher;
remove proprietary trial information from the match result data, thereby
generating sanitized match result data; and
send the sanitized match result data to the server.

In particular, the provisional date for the Michelson reference does not disclose or provide support for collecting the recited patient-specific data from the patient at the server (at least one of: disease of concern, demographic data, drug classes of interest, prior therapies, specific drugs of interest, years since diagnosis, stage of disease, phase of clinical trial, and concomitant diseases.)

Claims 2-4, 9-11, 20-22, and 32-33 incorporate the allowable features of claim 19 through dependency and are therefore also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
